PROFILE

A highly motivated, proactive individual who has a strong passion for learning new skills. I am an avid learner with the ability to adapt to different situations and complete tasks to a high standard within given timescales. An effective motivator and trouble-shooter with exceptional problem-solving skills. I am self-motivated and actively seek challenges.

EXPERIENCE

I have recently completed Code Nation's 12 week developer bootcamp and I am very keen to further my skills in the industry. During the course I have learned basic web development skills such as HTML, CSS and Javascript, using flexbox and media queries to create fully responsive sites. These skills were useful when creating more advanced full stack applications using React.js for front end UI as well as Node.js for server side back end. These applications are linked to Mongo DB in order to store data in the database such as usernames, passwords and personal data, in JSON format. I am also familiar with MYSQL when working with large amounts of table structured data. I have the ability to deploy applications using Heroku and Netlify so they are hosted on the web and can be widely accessed. I use version control on all projects, storing code in repositories on Github and also collaborating with other developers using branches to merge work. Working on projects in teams has highlighted the importance of clear and concise code as well as adding precise notes to describe the functionality of the code to ensure other developers are able to understand my work. Recently, I have been researching and learning the fundamentals of C# and C++ to diversify my portfolio and broaden my knowledge in the industry. I am also learning the basics of video game creation in Unreal Engine whilst continuing to work on some cool projects with React including a munro site and meal prep app.

STRENGTHS

- Excellent ability to work in a team and motivate others
- Ability to develop and coach others
- Excellent organisational and planning skills, with the ability to function smoothly and effectively in pressure situations and meet critical timescales
- A confident communicator with proven ability to influence and develop strong working relationships with colleagues, senior management and other departments
- Ability to analyse information and identify potential risks
- Able to act on initiative, identifying opportunities and being proactive in putting forward ideas and solutions to continually improve service and results

Technologies

- HTML
- CSS
- JavaScript
- React
- Node.JS
- MongoDB
- MYSQL
- Github

AWARDS

- Team Player Award SSE
- Sportscotland Basketball Referee
- Duke Of Edinburgh Bronze and Silver

CAREER

SSE Partnership Services March 2019 – December 2020

Customer Care

Perth High School (2008-2014)

Higher Photography C
Intermediate 2 Spanish B
Intermediate 2 Maths C
Intermediate 2 Business Management C
Standard Grade English 1
Standard Grade Physical Education 2
Standard Grade Spanish 2
Standard Grade Maths 2
Standard Grade Physics 3

INTERESTS

I am a keen gym and snowboarding enthusiast and try my best to maintain a generally healthy lifestyle. In June I set myself the target of completing all 282 of Scotland's Munros so I have been hiking regularly at the weekends and will continue to pursue this goal for the foreseeable. This has introduced me to ice climbing which I have really enjoyed during winter hikes. In my down time I enjoy reading, playing chess and watching educational content on subjects such as coding, the stock market and general mindset and motivation. I also love to network, regularly interacting with like minded people to broaden my skills in different areas through collated knowledge.
